Tipping devices

In all places where material is initially put into a bin in order to be compacted into a corresponding machine afterwards, the use of a tipping device is appropriate.

Husmann offers tipping devices of sturdy design and easy to maintain for different bin models and sizes.

Depending on the way of application, tipping devices can be supplied as integral, mobile or static ones.

MP compactor with laterally mounted integral tipping device and a safety cage

SPB compactor with integral tipping device

**Husmann offers individual solutions for various demands.
In the following are only few examples of the different designs:**

- Tipping devices with integrated shovel
- Integral tipping devices mounted on static compactors
- Static tipping devices for feeding via conveyor belt
- Tipping devices with automatic lid opening
- Mobile tipping devices for non-standard bins, powered by electric motors
- Mobile tipping devices for 120 l bins
- and many other designs...

Mobile tipping device for skeleton containers

Static tipping device as bin cleaning device

static compactors – portable compactors – compaction containers – transfer stations
large volume containers – skips – shredding systems – file shredders – special constructions

The machines shown are equipped with accessories which are not included in the base price.
