Umwelt-Technik

Shifting Systems

Husmann shifting devices are used where containers, static compactors and / or different kinds of machines have to be shifted lengthwise and / or crosswise.

Thanks to the great variety of well engineered and proven shifting devices, Husmann is even able to make complicated shifting and replacement procedures possible. All kinds of containers from 1,1 m³ containers over dumps, large volume compaction containers to 60 m³ trailer containers are moved all over the world on Husmann shifting devices.

Trolley for longitudinal shifting of open top containers

Traversing system for static compactor with special tipping device

Available Designs:

- ❖ Traversing shifting system for one, two or more containers
- ❖ Trolleys for longitudinal shifting
- ❖ Traversing and longitudinal shifting system (X-Y-shifting)
- ❖ Driving unit equipped with electric motor, hydraulically steerable
- ❖ Transport trolley with drawbar and swivel bolster for skip and hook type containers
- ❖ Scissor-type elevating platform with shifting system
- ❖ Low-lift shifting trolley with built-in hydraulic power pack
- ❖ Shifting devices with travelling mechanism suitable for cornering
- ❖ Square shifting system consisting of low lifting truck and U-shaped shifting trolley
- ❖ Travelling mechanism firmly mounted on a compactor
- ❖ Roller conveyor with and without driving unit

Traversing shifting system in front of a transfer station

Accessories:

- ❖ Cable drum with automatic rewinding
- ❖ Turntable for manual or hydraulic operation
- ❖ Shifting rails – either to be dowelled or embedded
- ❖ Electric safety bars
- ❖ Protection of the shifting trolleys by means of induction loops
- ❖ Position indication on traversing trolley
- ❖ Digital balance for weighing
- ❖ Fully automatic operation via PLC

Basic Equipment:

- ❖ Rail clearer
- ❖ Mechanical limit stops
- ❖ Geared braking motor on each trolley
- ❖ Integrated rollers as subframe support
- ❖ Roller bearing, each with two self-aligning bearings and one thrust bearing

Traversing shifting device with four PM containers

Extensive service package: own rental and leasing company, very efficient after-sales service, modern engineering offices

static compactors – portable compactors – transfer stations – large volume containers – steel dump bodies
wood chippers – shredders – crushers – special constructions

The machines shown are equipped with accessories which are not included in the basic price.
